I spoke with Tom yesterday and we agreed that we passed over some topics I had sent in my emailed response to the draft LDWG meeting agenda. Below is the list. I d like to have Erika be there for the first item, whenever we discuss it. I ve crossed out topics we touched on (though they re by no means resolved). The rest are items to track, and some are worth spending a little time on. I m putting them out there for inclusion on either date, both, or at another LDWG meeting (we could wait until April 20, if necessary).

Discuss "test case" in upper reach: How will the design address, say, the first half mile of the Lower Reach (RM 3-3:5).  
Discuss how you see this. \*Want Erika to join this discussion.

train cars/transloading: what can we do to move planning forward.

Norfolk plans

EE/CA and edges of EMJ

Rhone Poulenc tech meeting

How to facilitate RT input on 30% design? Site tour in upper reach?

Need to revive discussion on sediment modeling?

Discussion of how to ensure construction start in 2024

BA / BO - timing relative to consultation process

carbon plots – not done. Discuss options.

Results of the z-layer cores - plan to get z-layer samples in middle reach

Data - is it frozen? did they include EMJ data?

DWP and port's piece of the shoreline

T-117

Boeing Plant 2 sampling??

Other EAAs?

Hi Elly - Can you clarify the agenda for these meetings? Sorry...just trying to keep up :). We have a check in meeting scheduled for April 20.

Thanks!

Hello, all – I suggested April 6 to finish what we started 3/22, but Erika is away and Kristen can't join until 2.

April 13 (a week later) works for the EPA folks involved, not sure about Kristen. I'm only free from 1 – 2.

It might be wise to use both windows. I can discuss some of the topics on April 6 without a full complement of technical support, stuff about coordination and outreach, for example. Depending on what's left, at 2, Kristen can join. Then on April 13, from 1 – 2, we can use the time to answer questions about our comments, which you'll have in hand by then.

Feels like meetings are proliferating, but there's a lot we need to discuss!
